Soccer stat sheet

playhub-os.com/learn/soccer/printable-soccer-stat-sheet

Our team | Opponent | Field, home / away | Date, kickoff

PLAYER STATS

One row per shirt number. Use tally marks during the game and write the totals after. A goal is also a shot and a shot on target, so tally all three. Saves: goalkeepers only.

SHIRT #	GOALS	ASSISTS	SHOTS	ON TARGET	SAVES	YELLOW	RED

GOALS

Write each goal as it happens. If the referee waves it off, cross it out: the referee's call is the score.

HALF	MINUTE	TEAM	SCORER #	ASSIST #	SCORE AFTER	NOTE (OWN GOAL, PENALTY, DEFLECTION)

What counts (NCAA conventions; the IFAB Laws of the Game don't define these stats, so agree yours before the season).
Shot: "an attempt that is taken with the intent of scoring and is directed toward the goal" (NCAA Rule 10.3.1). A cross is not a shot.
On target (shot on goal): ends in "a save by the goalkeeper or defending team or a goal" (NCAA Statisticians' Manual, Sec. 3 Art. 3). Off the post and out is a shot, not on target.
Save: the goalkeeper "stops a shot that otherwise would have gone into the goal" (Rule 10.3.3).
Assist: "a pass leading directly to a goal," no more than two per goal, none on a penalty kick (Rules 10.5.1, 10.5.4).
Check at the final whistle: our shots on target = our goals (not own goals) + their goalkeeper's saves + shots their defenders stopped that were going in.

The score follows the referee: under Law 5.2 of the IFAB Laws of the Game 2026/27, the referee's decisions on "whether or not a goal is scored" are final. Shirt numbers only on this sheet; keep children's names off anything you post. From PlayHub, which is not affiliated with the NCAA, The IFAB or any league.
